Subject: IUPAC General Assembly and World Chemistry Congress in San Juan

Dear Flor,

It has been my great pleasure and privilege to work with you and all of your colleagues in the Colegio de Químicos de Puerto Rico during the past year and one half to plan and bring to a successful conclusion every aspect of the recent IUPAC General Assembly and World Chemistry Congress in San Juan. I offer my warmest congratulations for a magnificent job accomplished. The feedback that I have received from IUPAC members who attended has been overwhelmingly positive. Some of the older members who have participated in several General Assemblies in the past told me that this was the best-planned and best-executed event of all of them in their memories.

The spirit of everyone involved, from the organizing committee to all of the volunteers who worked directly with us, was simply superb. Puerto Rico has set a new standard for all General Assemblies and Congresses to come. On a personal note, more important to me is that fact that I have been able to develop new friendships that I hope will remain and grow in the future.

As we move forward with our more routine daily activities, I wish you and everyone in the CQPR the best of health and happiness.

With sincerest good wishes,

Dr. Terry Renner  
Executive Director, IUPAC
